

Quest: to be able to complete CSCI 380 oracle homework from home.

Process: Create an SSH tunnel to BASIL, connect and then open web browser to localhost:8080/apex

Steps for completing on a windows machine:

1. Open SSH: Secure Shell (screen shots from version 3.2.9)
2. File -> Profile -> Add Profile
3. Enter a name; hit enter.
4. File -> Profile -> Edit Profile
5. Make sure the profile you have created is chosen on left side of window.
  - a. Click: *Connection* tab
    - i. Hostname: lab.cs.uwp.edu
    - ii. Username: Yours
  - b. Click: *Tunneling* tab.
  - c. Click: *Add* button: to add an outgoing tunnel.
    - i. Display name: Oracle
    - ii. Type: TCP
    - iii. Listen port: 8080
    - iv. Allow local... checked
    - v. Dest. Host: basil.cs.uwp.edu
    - vi. Dest. Port: 8080
  - d. Click *OK*, when done.

6. Close SSH and reopen.
7. To use: open SSH, click Profiles and enter your password
8. Open web browser to: localhost:8080/apex
9. Enjoy!
